FEEL GOOD FACTOR

During COVID-19

Lockdown was boring, don't you agree?

With nothing to do and nowhere to be.

What made me feel happy was enjoying the sun,
Being out in the heat was just so much fun!

There's so much to do when the weather is warm,
going out for a cycle became the norm.

At a two-metre distance I met up with friends,
Dancing and farming, the list never ends!

On the 12th March, it was calving season.

I took care of four calves for a VERY good reason.

Now they are bigger and stronger you see,

So the money they make will belong to me!

Now that schools have reopened it's really exciting,

But with all the restrictions it's very nail biting.

My Feel Good Factor, as you have just seen,

Is what helps me get through what is COVID-19!
