

My Quarantine Feel-Good Factor

Now that Quarantine is over and I'm back in school,
Let me tell you all the things we had to do
To keep our families safe, communities and counties too!
It all started, really when school closed.
No seeing friends, going out or shopping for clothes.
So, what do we do?
Well nothing, you see. Just stay at home with my whole family.
It was so annoying at first, with siblings all around,
The house felt smaller than I had ever found.
We waited and waited, just to get back to school,
For it was March and we needed to finish the year through!
When weeks turned into months
It was very hard
To see us going back to school.
To seeing friends and family.
So, we had to wait ...
Nothing could be done to STOP this awful thing!
Nothing could be done!
Not a single thing!
So, we had to make the most
Of what we got because,
There was no way to get us out of this spot.
It took me a while
And it did, to realise

Wow! I have my family!
